Chris Rosenau

Multimedia Learning Designer

Dallas, Texas | 945-217-2211 | rosenauproductions@gmail.com | linkedin.com/in/christopherrosenau |
Portfolio: resume-rho-taupe.vercel.app/?lens=media

SUMMARY

I turn complex software and technical concepts into engaging videos, clear visual learning resources, and intuitive digital experiences.

Open to learning media, multimedia design, and instructional design roles.

SKILLS

Video & animation: PowerPoint video, Synthesia, Vyond, Premiere, After Effects

Graphic design & job aids: Job aids (inline Rise, PDF, PowerPoint), Layout & visual hierarchy, Print & conference graphics, Reference guides

Instructional design: Articulate Rise, Articulate Storyline, ADDIE, CBT & storyboards

LMS & delivery: Canvas administration, AWS-hosted Rise, CSS / iframe UX, JS translation layer

AI & programming: Claude / ChatGPT / Grok, JavaScript, CSS, HTML / web delivery

EXPERIENCE

Instructional Design Specialist (Media) — Medical Sales College — Feb 2024 – July 2026 · Remote

- Transformed Google Slides and PDFs into production-quality learning videos through graphic treatment and PowerPoint animation
- Designed job aids for each course's material — placed inline in Rise, or delivered as PDFs or PowerPoints depending on use (training vs. on-site reference)
- Led hybrid migration of instructor-led content into an accessible online format — Rise/Storyline modules, animated training video, and Canvas administration with custom enhancements
- Produced remote-instructor video and Vyond scenario content that simulated real patient cycles of care
- Accelerated production with LLM workflows (Claude, ChatGPT, Grok) for scripting, iteration, and video polish
- Owned Canvas LMS operations: troubleshooting, custom programming, and day-to-day instructor support

Multimedia Director & E-Learning Design — Higher Ed Partners — May 2022 – Dec 2023 · Dallas, Texas

- Replaced slow traditional filming cycles with Synthesia avatar templates that scaled video production across courses
- Enabled remote Rise updates via AWS hosting inside Canvas — eliminating repeated master-course propagations
- Improved learner UX with CSS that fixed iframe rendering for AWS-hosted content
- Standardized Vimeo delivery for parallel multimedia updates and consistent accessibility
- Shipped a JavaScript translation layer in Canvas so learners could view content in their preferred language
- Mapped delivery workflows to expose process gaps and tighten handoffs across teams

Contractor — Instructional Designer — iCode School Franchise / Intuit — Dec 2021 – May 2022

- Drove course development end to end with ADDIE — from scope and timelines through delivery
- Aligned stakeholders on requirements, goals, and milestones before build began
- Built Storyline templates and multimedia web modules with interactive objects for LMS delivery
- Partnered with SMEs to produce videos, graphics, instructor manuals, CBT modules, and storyboards

Video Editor, Graphic Artist & E-Learning Designer — ProPricer Jan 2001 – Dec 2021 · Bedford, Texas

- Owned media projects end to end: storyboarding, effects, post-production, and final delivery formats
- Delivered training videos for digital distribution with graphics, sound design, and music mix
- Produced the EBS Texas PR announcement — script, drone/handheld film, narration, edit, and deployment
- Created magazine ads, conference print graphics, and interactive media with custom photo backgrounds

E-Learning Designer — Concordia University Irvine Feb 2016 – Oct 2020 · Irvine, California

- Built animated course graphics from scripts with narration and SRT subtitles (Vyond / After Effects)
- Assembled Storyline courses with Q&A feedback, flow control, and assessment results
- Delivered Eastern History (HST301): a 9-week animated series with custom character rigging and culturally resonant storytelling
- Managed script-to-screen workflow and client change requests without derailing delivery dates

SELECTED PROJECTS

Pistomp-Mobile · github.com/rosenauproductions/Pistomp-Mobile
Mobile-first companion web app for the open-source Pi-Stomp multi-effects platform. TypeScript + Vite PWA for pedalboard control, effect bypass, A/B snapshots, gain, and per-effect parameters over the MOD-UI API — optimized for phone use on the Pi's Wi-Fi hotspot, with install and admin features.

StepBot — Canvas LMS help bot · github.com/rosenauproductions/StepBot-MSC
Embeddable Canvas help bot with multi-step guided answers, session memory, admin/creator tooling, and theming. Built for easy content management and multi-site deployment.

Interactive party games & more · github.com/rosenauproductions
Browser-based Family Feud and The 1% Club with projector + host + phone controllers, built for live group play — experiments in interactive media and rapid prototyping.
